

System cabinet product information:

NSC art.: 920093X

Modular cabinet system for industrial production (VDE compliant)

Organise your system cabinet precisely as required by the application. The modular extendible cabinet will form the basis of this (art.: 9200931). It is ideal for the production-related storage and application of electronic systems & tools thanks to its ventilated storage space. Optimum illumination and thermostat-regulated ventilation for preventing heat accumulation are provided as standard. RCCB as added protection for the operator, a power strip for up to 9 connections and 2 adjustable Medi shelves. The positioning and number of (optional) drawers, device shelves, shutters, Nordisch charging systems etc. is determined by the customer and depends on the application.

Example configurations:
NSC variants

Optional components:

- Document drawer (height approx. 75 mm)
- Tool drawers (height 150/200/300 mm)
- Medi shelf (up to 60 kg)
- Sliding shelf
- Manual emergency stop (for critical applications)
- Safety pack (fume alarm function)
- etc.
